

A3 CANDIDATE — what would put this bid out if the valid ops of ADD-03 stood (NOT VALIDATED)

Candidate state ADD-03 (NOT validated: the validated state is ADD-02) (issued 2026-11-15); Proposal Due Date 2026-11-26 14:00 Riyadh time. 207 register rows; 17 with an explicit consequence.

CANDIDATE — NOT VALIDATED. The validated A3 (a3.pdf, one page) stays at ADD-02 and is unchanged. This candidate is a view for review, not a deliverable: every op in it is a proposal and nothing is accepted. It is not held to the one-page rule (C43 applies to the validated A3 only) and runs to 9 pages.

What may be changing

ADD-03 is PARTIAL: 23 of 54 provisions unresolved, so A3 and A5 stay validated at ADD-02. If the 12 op(s) that are valid there stood (each still a proposal: review proposed 12), A3 would gain 0 row(s) (none), lose 0 (none) and change 1 (VOL-IV-F4F-02 (register)); A5, replanned at ADD-03's issue date (2026-11-15), would move the latest dates of 0 activities (none), add 0 (none) and remove 0 (none), and marks 5 REVIEW through relationships. Not settled: 11 activities blocked by an unresolved row (fin-model-build, technical-proposal, fin-model-freeze, form-4a-prep and 7 more), 2 STALE row(s), 0 obligation(s) reaching no output (C46), 0 relationship chain(s) blocked or incomplete, 8 conflict(s); documents not supplied: the Environmental Permit issued for the site, Volume V Schedule 11 (Project Company Events of Default), Volume V Schedule 7 (deductions), I-PERMIT and 6 more. Nothing here is validated, accepted or applied to the real state.

Open issues in play: kept open, never resolved here (13)

I-ADD03-29.2-NO-OP (Commercial lead): ADD-03 3.3 ('Volume V Clause 29.2 is deleted and replaced by the following') has no promoted amendment op. As a result, VOL-V:29.2 at ADD-03 still reads 60% indexed / 40% fixed, and row VOL-V-29.2-01 cannot be re-read. Under the replacement clause the Bidder chooses the Indexed Proportion within 50–70% for years 1–10 and states it in Form 4-F (Q20); from year 11 it is 75%. Schedule 9 is still not... — via ADD-03-3.2-01

I-ADD03-PRICE-BASIS (Commercial lead): ADD-03 gives two price bases for the Availability Payment. (1) 3.1 amends VOL-V 1.1 to 'the annual payment, expressed at Base Date prices'. 3.3 replaces VOL-V 29.2 so that indexation runs 'annually from the Base Date', which is 28 days before the PDD. (2) Q19 says the Form 4-F figure is 'the amount payable for year 1 of operations, in the prices of that year' and that 'Indexation under Volume V C... — via ADD-03-3.2-01

I-ADD03-T51-DATUM (Technical lead): VOL-II 5.6 (ADD-03 7.1) incorporates Table 5-1, and ADD-03 7.2 says the Arabic text governs. The Arabic column heading at Appendix A, as read in a reading that is still pending approval, measures maximum height above natural ground level ('منسوب الأرض الطبيعية'). The convenience English at Appendix B, note (2), measures it 'from finished ground level after grading and filling'. Where the site is ... — via ADD-03-7.1-01

I-BIDDER-FACTS (Bid manager): Bidder facts (members, signatories, attendance, references) are configurable assumptions, not facts; confirm them — via VOL-IV-F4A-06, VOL-IV-F4A-07

I-CONCESSION (Legal): Concession term: VOL-I 12.1 (25 years from PCOD) vs VOL-V 3.1 (from the Effective Date). Settled by ADD-02 Q7: the order of precedence in VOL-I 3.2 applies, under which Volume I prevails over Volume V, and no further amendment is considered necessary. Follow-up only: Volume V is not amended, so the Form 4-E deemed-acceptance note and the reading of 'the term' in VOL-V 3.2 and 42.2 remain (draft q... — via VOL-I-9.6-01

I-F4A-FIELDS (Legal): Reissued Form 4-A (ADD-01 App A) drops fields and the numbered confirmations of the original and states a purpose ('acknowledgement of Addenda at paragraph 1') it has no paragraph for; what to print and sign, and whether to seek clarification before the cut-off — via VOL-IV-F4A-01, VOL-IV-F4A-02, VOL-IV-F4A-03, VOL-IV-F4A-04, VOL-IV-F4A-05, VOL-IV-F4A-06, VOL-IV-F4A-07

I-NO-CONSEQUENCE (Bid manager): The clause states no consequence of its own. A mandatory requirement is subject to the responsiveness and mandatory compliance check on a pass or fail basis (VOL-I 11.1(i)); only Proposals that pass it go on to technical evaluation (11.1(ii)). The pack gives no clause-specific label and does not say whether a failure is curable; none is implied — via VOL-I-10.2-01, VOL-I-10.3-01, VOL-I-10.3-02, VOL-I-10.6-01, VOL-I-6.2-01, VOL-I-8.3-01, VOL-I-9.7-01, VOL-IV-F4A-03

I-PERMIT (Technical): Table 2-4 is reproduced from an Environmental Permit that is not in the pack. The precedence language is in the VOL-II p3 reproduction preamble ('the Environmental Permit shall prevail'; VOL-II 2.4 incorporates the table by reference); the owner confirmed that location on 3 Oct 2026. I-READING-T24 (Owner): Table 2-4 (image): the visible transcription (rows, headings, units, limits, assessment bases, the qualifier and Note 1) was confirmed by the owner (Ahmad, 3 Oct 2026; approval of VOL-II-p3-r1). TN = 5 mg/l is the original reading; 3 mg/l is ADD-02 5.1's separate amended value. Still open: anything outside the visible image (e.g. whether a further note was cut off below Note 1) — via VOL-II-3.1-01

I-VOL-I-ENV-A-PRICES (Bid manager): VOL-I 6.2 makes any price, rate or other commercial information in Envelope A non-responsive, but Form 4-B (Envelope A) asks for each reference's contract value in SAR — via VOL-I-6.2-02

I-VOL-I-ENV-B (Bid manager): VOL-I 10.1: Envelope B holds 'only' Form 4-F and the Financial Model, yet 10.3 (model auditor's opinion) and 10.6 (financing assumptions schedule) need more documents; where they go is unstated — via VOL-I-10.3-02, VOL-I-10.6-01, VOL-IV-F4F-01

I-VOL-I-FILE-NAMES (Bid manager): The Financial Model must be in Microsoft Excel (VOL-I 10.3); settled. Open: how the Appendix 2 naming convention, which ends in '.pdf' and does not define [BIDDER] or the date in [YYYYMMDD], applies to it (draft question CQ-FILENAMES) — via VOL-I-10.3-01

I-VOL-II-MISSING (Technical lead): Not in the pack: ESIA (VOL-II 9.1) and geotechnical report (ADD-01 Q4), both 'in the data room'; tie-in points (1.3); asset register format (7.4). ESIA compliance and ground risk unverifiable — via VOL-II-9.1-01

Conditional scenarios (0)

None in the op file: no op or unresolved provision says it is conditional or effective-dated.

Image-read units: crops, Arabic verbatim, translations apart, table context, units, uncertainties

The review packet of each region (in the evidence build) shows every crop beside its reading. Translations are proposals, never evidence; what a value means (maximum, range, target) is decided by a person.

ADD-03-p4-r1 (ADD-03 p4; reading pending): packet <evidence build>/review/ADD-03-p4-r1/packet.html

uncertainty: The table is ruled in the image but no grid was detected from pixels; rows are therefore read as band lines with ' | ' between cells in right-to-left reading order.

uncertainty: Band 5 is measured from x=34 although the printed text starts near x=625; the extra extent is taken to be speckle, not text.

uncertainty: The signature in band 13 left is a drawn stroke, not text; it is not transcribed.

uncertainty: Diacritics (shadda on المعَدَات and الحَدّ; damma/kasra on يُحَدَّد, يُقاس; tanween on يوماً, مترأ) were read on the enlarged crops.

uncertainty: prepared_by is left empty for the controller to write.

uncertainty: `table-header`: no ruled grid was detected although the image shows a ruled table; columns are separated here with ' | ' in reading (right-to-left) order, which is a reading convention, not printed text

uncertainty: `row-a`: the thousands separator in ١,٥٠٠ is read as the Arabic thousands separator (U+066C); it could be printed as an apostrophe-like mark; reviewer to confirm it is not a decimal mark (1.5)

uncertainty: `row-a`: the description cell is printed on two lines within band 7 ('...ضمن مسافة' / '١,٥٠٠ متر...'); it is stored as one line

VOL-II-p3-r1 (VOL-II p3; reading approved): packet <evidence build>/review/VOL-II-p3-r1/packet.html — not touched by ADD-03; kept available

uncertainty: The table is a scan with speckle and a measured skew of about -0.34 degrees; values were read at native resolution.

uncertainty: Table 2-4 is stated to be reproduced from an Environmental Permit that is not in the pack; this reading says what the image shows, nothing about the Permit.

uncertainty: `note1`: Note 1 is the last line of the image and touches its bottom edge; the image may be cropped. The page continues with 'End of reproduction.' in the text layer, but whether a further note was cut off cannot be established from the pack.

uncertainty: row `FaecalColiforms`: decimal point in 2.2: clear at native resolution, but a speckled scan can imitate a point; reviewer to confirm

uncertainty: row `ResidualChlorine`: printed as a range although the qualifier says 'all values are maxima'; whether 0.5 is a binding minimum is an interpretation for a person, not a reading question

uncertainty: row `pH`: unit cell shows a dash, read as 'no unit'

uncertainty: row `pH`: range printed under a 'maxima' qualifier (see Residual Chlorine)

VOL-IV-p6-r1 (VOL-IV p6; reading approved): packet <evidence build>/review/VOL-IV-p6-r1/packet.html — not touched by ADD-03; kept available

uncertainty: Diacritics (tanween on كاملاً, خامساً, رابعاً, ثالثاً, ثانياً, أولاً; hamza forms) were checked on native pixels; at reduced zoom they disappear, so review the native crops, not a scaled view.

uncertainty: Where printed tanween sits relative to the final alef is not visible; it is stored after the alef. Matching text removes tashkeel, so this does not affect matching.

uncertainty: Blank fill-in lines under each field label are rule bands (structure), not text.

uncertainty: `decl4`: translation of استبعاد العرض as 'exclusion of the proposal': the English text of the pack never uses 'exclusion'; how it maps to the pack's rejection / disqualification / non-responsiveness categories is for a person to decide

uncertainty: `decl5` numeral ٢-٤: Order is settled: the crop shows the hyphenated pair left to right as [digit]-[٤], which is what logical 4-x renders as. Identity of the left digit is not settled by machine: shape (chamfer) comparison favours ٢ over ٤ at three thresholds, a template-overlap score favoured ٢, and the preparer's visual comparison favours ٢. Reviewer to read the crop.
