A3 CANDIDATE — what would put this bid out if the valid ops of ADD-03 stood (NOT VALIDATED)

Candidate state ADD-03 (NOT validated: the validated state is ADD-02) (issued 2026-11-08); Proposal Due Date (PDD) 2026-12-10 14:00 Riyadh time. 15 (+ VOL-IV-F4C-N1, which restates VOL-I-9.4-01) explicit bid-out triggers + 1 below the score threshold = 17 A3 rows. WD: Working Day; PBN: Preferred Bidder Notification; LCC: Local Content Certificate; PCOD: Project Commercial Operation Date; †: decide before submission (no decision recorded).

CANDIDATE — NOT VALIDATED. The validated A3 (a3.pdf, one page) stays at ADD-02 and is unchanged. This candidate is a view for review, not a deliverable: every op in it is a proposal and nothing is accepted. It is not held to the one-page rule (C43 applies to the validated A3 only) and runs to 8 pages.

What may be changing

ADD-03 is PARTIAL: 2 of 19 provisions unresolved, so A3 and A5 stay validated at ADD-02. If the 13 op(s) that are valid there stood (each still a proposal: review accepted 13), A3 would gain 1 row(s) (ADD-03-cover-para3-01 (ADD-03/cover/para3)), lose 1 (ADD-02-7.2-01 (ADD-03/3.1(a))) and change 5 (ADD-02-F4G-04 (register), VOL-I-6.1-01 (ADD-03/2.1), VOL-I-6.3-01 (ADD-03/5.2(a)), VOL-I-6.4-01 (ADD-03/5.1) and 1 more); A5, replanned at ADD-03's issue date (2026-11-08), would move the latest dates of 43 activities (assemble-envelope-a, assemble-envelope-b, bond-approval, bond-issue and 39 more), add 0 (none) and remove 0 (none), and marks 8 REVIEW through relationships. Not settled: 8 activities blocked by an unresolved row (references, bond-approval, clarifications, form-4g-review and 4 more), 5 STALE row(s), 0 obligation(s) reaching no output (C46), 9 relationship chain(s) blocked or incomplete, 1 conflict(s); documents not supplied: the Environmental Permit issued for the site, Volume V Schedule 11 (Project Company Events of Default), Volume V Schedule 7 (deductions), I-PERMIT and 7 more. Nothing here is validated, accepted or applied to the real state.

Blockers: what stops the candidate becoming the validated state, or what it cannot establish

Unresolved provisions (2)

ADD-03:2.2 (ADD-03 p1; unresolved): ambiguous: 'Every period calculated by reference to the Proposal Due Date is adjusted accordingly.' names no clause, unlike ADD-01:2.2 which listed Volume I Clauses 5.2, 6.3, 7.1 and footnote 12 to Clause 8.5. Reading A: the same periods ADD-01:2.2 listed; Reading B: every PDD-referenced period in the RFP Documents at ADD-03, including any this Addendum amends elsewhere (Bid Bond, Proposal validity per Q18). Annotating targets would widen scope beyond the printed words; a person (Bid management) decides the targets. [AI workflow run ADD-03-run-host-20261015T140902Z-ab89 (route host, model claude-code headless (claude-opus-5-5)); PROPOSED; not reviewed] — words: "Every period calculated by reference to the Proposal Due Date is adjusted accordingly."; rows: VOL-I-5.2-01, VOL-I-6.3-01, VOL-I-7.1-01, VOL-I-8.5-01; activities: bond-approval, bond-issue, clarifications, form-4a, form-4a-prep, references

ADD-03:4.3 (ADD-03 p1; unresolved): ambiguous: ADD-03:4.3 prints only 'Volume I Clause 1.3 is amended correspondingly.' and no old/new words. VOL-I:1.3 at ADD-02 reads 'nominal capacity one hundred and twenty thousand cubic metres per day (120,000 m³/day)'. Reading (a): both the spelled-out words and the figure are amended to correspond to the 150,000 m³/day substituted by ADD-03:4.1 (the new spelled-out words are not printed anywhere in the addendum). Reading (b): only the figure '120,000 m³/day' is substituted by '150,000 m³/day' as printed in ADD-03:4.1, leaving the words 'one hundred and twenty thousand cubic metres per day' (an internal inconsistency). No op is proposed; a person decides the reading and the exact new text. None in the op file: no op or unresolved provision says it is conditional or effective-dated.

Image-read units: crops, Arabic verbatim, translations apart, table context, units, uncertainties

The review packet of each region (in the evidence build) shows every crop beside its reading. Translations are proposals, never evidence; what a value means (maximum, range, target) is decided by a person.

VOL-II-p3-r1 (VOL-II p3; reading approved): packet <evidence build>/review/VOL-II-p3-r1/packet.html

uncertainty: The table is a scan with speckle and a measured skew of about -0.34 degrees; values were read at native resolution.

uncertainty: Table 2-4 is stated to be reproduced from an Environmental Permit that is not in the pack; this reading says what the image shows, nothing about the Permit.

uncertainty: `note1`: Note 1 is the last line of the image and touches its bottom edge; the image may be cropped. The page continues with 'End of reproduction.' in the text layer, but whether a further note was cut off cannot be established from the pack.

uncertainty: row `FaecalColiforms`: decimal point in 2.2: clear at native resolution, but a speckled scan can imitate a point; reviewer to confirm

uncertainty: row `ResidualChlorine`: printed as a range although the qualifier says 'all values are maxima'; whether 0.5 is a binding minimum is an interpretation for a person, not a reading question

uncertainty: row `pH`: unit cell shows a dash, read as 'no unit'

uncertainty: row `pH`: range printed under a 'maxima' qualifier (see Residual Chlorine)

uncertainty: Diacritics (tanween on أولاً, ثانياً, ثالثاً, رابعاً, خامساً, كاملاً; hamza forms) were checked on native pixels; at reduced zoom they disappear, so review the native crops, not a scaled view.

uncertainty: Where printed tanween sits relative to the final alef is not visible; it is stored after the alef. Matching text removes tashkeel, so this does not affect matching.

uncertainty: Blank fill-in lines under each field label are rule bands (structure), not text.

uncertainty: `decl4`: translation of استبعاد العرض as 'exclusion of the proposal': the English text of the pack never uses 'exclusion'; how it maps to the pack's rejection / disqualification / non-responsiveness categories is for a person to decide

uncertainty: `decl5` numeral `٢-٤`: Order is settled: the crop shows the hyphenated pair left to right as [digit]-[٤], which is what logical 4-x renders as. Identity of the left digit is not settled by machine: shape (chamfer) comparison favours ٢ over ٣ at three thresholds, a template-overlap score favoured ٣, and the preparer's visual comparison favours ٢. Reviewer to read the crop.
