

A3 CANDIDATE — what would put this bid out if the valid ops of ADD-03 stood (NOT VALIDATED)

Candidate state ADD-03 (NOT validated: the validated state is ADD-02) (issued 2026-11-17); Proposal Due Date (PDD) 2026-11-26 14:00 Riyadh time. 16 (+ VOL-IV-F4C-N1, which restates VOL-I-9.4-01) explicit bid-out triggers + 1 below the score threshold = 18 A3 rows. WD: Working Day; PBN: Preferred Bidder Notification; LCC: Local Content Certificate; PCOD: Project Commercial Operation Date; †: decide before submission (no decision recorded); ■: a legal, commercial or technical judgment no one has recorded.

CANDIDATE — NOT VALIDATED. The validated A3 (a3.pdf, one page) stays at ADD-02 and is unchanged. This candidate is a view for review, not a deliverable: every op in it is a proposal and nothing is accepted. It is not held to the one-page rule (C43 applies to the validated A3 only) and runs to 10 pages.

What may be changing

ADD-03 is PARTIAL: 36 of 49 provisions unresolved, so A3 and A5 stay validated at ADD-02. If the 2 op(s) that are valid there stood (each still a proposal: review proposed 2), A3 would gain 0 row(s) (none), lose 0 (none) and change 0 (none); A5, replanned at ADD-03's issue date (2026-11-17), would move the latest dates of 0 activities (none), add 0 (none) and remove 0 (none), and marks 0 REVIEW through relationships. Not settled: 14 activities blocked by an unresolved row (fin-model-build, technical-proposal, lender-terms, deviations-review and 10 more), 0 STALE row(s), 0 obligation(s) reaching no output (C46), 0 relationship chain(s) blocked or incomplete, 3 conflict(s); documents not supplied: the Environmental Permit issued for the site, Volume V Schedule 11 (Project Company Events of Default), Volume V Schedule 7 (deductions), I-PERMIT and 6 more. Clarification route: the clarification window closed on 2026-11-12 (VOL-I 5.2): this question cannot be submitted as a clarification; it is a bid-decision for a person. Nothing here is validated, accepted or applied to the real state.

Unresolved provisions (36)

ADD-03:1.2 (ADD-03 p1; conflicting): interpretive rule containing an exception ('unless otherwise stated'): 'A reference in this Addendum to a Clause, Table or Form is to that Clause, Table or Form as amended by Addenda Nos. 1 and 2, unless otherwise stated.' It bears on the base of ADD-03:2.1 (VOL-V:36.2 at ADD-02 is SAR 2,500,000) and conflicts with the cover figure; a person must confirm its effect. uncertainty: Signature scribble and oval seal carry no legible text.

uncertainty: Row 5 life is printed in months under a years heading.

uncertainty: Vocalisation marks (tashkeel) were read at native resolution and not verified.

uncertainty: `note1`: vocalisation marks read at native resolution; not verified

uncertainty: `english`: band 17 right holds only the oval seal, with no legible text; the empty line records that it was examined

uncertainty: row `r5`: min_life for row 5 is printed in months (24 months) under a column heading that says years (سنة); the difference is not resolved here

- VOL-II-p3-r1** (VOL-II p3; reading approved): packet <evidence build>/review/VOL-II-p3-r1/packet.html — not touched by ADD-03; kept available
- uncertainty: The table is a scan with speckle and a measured skew of about -0.34 degrees; values were read at native resolution.
- uncertainty: Table 2-4 is stated to be reproduced from an Environmental Permit that is not in the pack; this reading says what the image shows, nothing about the Permit.
- uncertainty: `note1`: Note 1 is the last line of the image and touches its bottom edge; the image may be cropped. The page continues with 'End of reproduction.' in the text layer, but whether a further note was cut off cannot be established from the pack.
- uncertainty: row `FaecalColiforms`: decimal point in 2.2: clear at native resolution, but a speckled scan can imitate a point; reviewer to confirm
- uncertainty: row `ResidualChlorine`: printed as a range although the qualifier says 'all values are maxima'; whether 0.5 is a binding minimum is an interpretation for a person, not a reading question
- uncertainty: row `pH`: unit cell shows a dash, read as 'no unit'
- uncertainty: row `pH`: range printed under a 'maxima' qualifier (see Residual Chlorine)
- VOL-IV-p6-r1** (VOL-IV p6; reading approved): packet <evidence build>/review/VOL-IV-p6-r1/packet.html — not touched by ADD-03; kept available

uncertainty: Diacritics (tanween on كَامِلاً، خامساً، رابعاً، ثالثاً، ثانياً، أولاً; hamza forms) were checked on native pixels; at reduced zoom they disappear, so review the native crops, not a scaled view.

uncertainty: Where printed tanween sits relative to the final alef is not visible; it is stored after the alef. Matching text removes tashkeel, so this does not affect matching.

uncertainty: Blank fill-in lines under each field label are rule bands (structure), not text.

uncertainty: `decl4`: translation of استبعاد العرض as 'exclusion of the proposal': the English text of the pack never uses 'exclusion'; how it maps to the pack's rejection / disqualification / non-responsiveness categories is for a person to decide

uncertainty: `decl5` numeral ر-٤: Order is settled: the crop shows the hyphenated pair left to right as [digit]-[٤], which is what logical 4-x renders as. Identity of the left digit is not settled by machine: shape (chamfer) comparison favours ر over ٤ at three thresholds, a template-overlap score favoured ر, and the preparer's visual comparison favours ر. Reviewer to read the crop.
